

Handled with **care**

EleCare® is nutritionally complete, hypoallergenic, amino acid-based formula for infants with food allergies or gastrointestinal disorders.

Finding the right formula

Finding the nutrition product that works for your infant with food allergies or GI conditions may have required the trial of multiple formulas. Now that your child's physician has recommended amino acid-based EleCare®, you may wonder how it's different from other formulas. An amino acid-based formula, like EleCare, is designed for infants who cannot tolerate intact or hydrolyzed protein.

STANDARD FORMULA

Made with intact protein, typically from cow's milk

EXTENSIVELY HYDROLYZED FORMULA

Made with broken-down (hydrolyzed) protein

AMINO ACID-BASED FORMULA

Made with free amino acids, the most broken-down building blocks of protein

EleCare helps provide nutrition for infants experiencing:

- Food allergies
- Protein maldigestion
- Malabsorption
- Short bowel syndrome
- Eosinophilic GI disorders
- GI tract impairment
- Other conditions requiring an amino acid-based diet
