

Directions and Preparation for Use

EleCare®

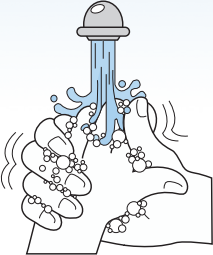

Refer to label for additional preparation, use, and storage instructions. To be completed by healthcare professional.

Patient's Name: _____

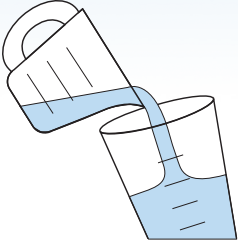

Recommended Formula: EleCare® (for infants 0–12 months) EleCare® Jr (for ages 1 and up)

To prepare EleCare and EleCare Jr

Follow the preparation directions below for EleCare or EleCare Jr powder and desired amount of water.

1 Wash your hands, surfaces, and utensils.

2 Pour _____ fl oz of water into mixing container.

3 Add _____ unpacked, level scoops of EleCare or EleCare Jr Powder, using only the scoop provided in the can, to make _____ Cal/fl oz.

4 Cap mixing container and shake very well. Once feeding begins, use within 1 hour or discard.

When mixed as directed on the label, the contents of 1 can (400 g) of EleCare powder will make approximately 95 fl oz of formula at 20 Cal/fl oz, or 1 can of EleCare Jr powder will make approximately 62 fl oz of EleCare Jr at 30 Cal/fl oz.

Storage: Immediately store prepared individual feeding bottles or other containers in refrigerator at 35–40 °F (2–4 °C) and use within 24 hours.

Warning: Never use a microwave oven to warm formula. Serious burns can result.
